

Materials Needed:

- White Paper (any kind you have available, but thin paper is easier to cut)
- Scissors
- Markers

Instructions:

1. If needed, cut the paper so that all four sides are equal in length.
2. Fold the paper in half, making a triangle.
3. Fold the paper again, in half, making another triangle. Repeat this step twice again, so you have now folded four times.
4. Cut notches from each side of your folded paper triangle. You can make many notches or just a few.
5. Unfold the paper and reveal your snowflake.
6. Have them write their resolution(s) on the snowflake or make a tag with their written resolution on it that you can hang with their snowflake.
7. Punch a hole at the top of one of the points. Thread a ribbon or string through it and hang it as a decoration.
